### Request for Information (RFI) for the Integrated Renewable Energy and Resource Efficiency Programme (iREREP)

Introduction of the Integrated Renewable Energy and Resource Efficiency Programme (iREREP) and Context

The Department of Public Works and Infrastructure (DPWI) is the largest property owner in South Africa covering 37 million square meters (sqm) over more than 92,000 facilities.

The DPWI, supported by the National Treasury's Government Technical Advisory Centre has developed a programme aimed at rolling out energy efficiency (i.e. solar + geysers), water efficiency, alternative waste management and embedded solar PV, and other renewable energy options at its property portfolio through private sector participation.

The iREREP will see the introduction of alternative sources of supply and demand side management from the current single source supply model. The Programme seeks to implement the objectives of the DPWI, Green Building Policy and contributing toward building South Africa's green economy, and has the following potential benefits:

- Reduced dependency on single suppliers and improved water and energy security of supply;
- Improved generation and reduced risk in relation to utilities;
- Cheaper reliable sources of utilities and increased value for money in the procurement of electricity, water and waste management;
- A more environmentally friendly and sustainable building portfolio;
- Increased socio-economic development impact opportunities in the built environment.

The DPWI hereby requests interested parties in the private sector to submit a Response to this Request for Information (RFI) in order:

- To enable the DPWI to conduct a market sounding exercise to secure the views of interested parties which the DPWI will use for the further structuring and implementation of the iREREP;
- To understand the appetite and readiness of the market to participate in the iREREP;
- To encourage interested parties to share information that may be relevant to the structuring and implementation of the iREREP on topics raised in the RFI;
- For the DPWI to obtain a high-level understanding of optimal technical solutions that are available in the market in relation to the iREREP and the capacity of the private sector to deliver on such solutions;
- For the DPWI to gauge if there are any potential exclusionary barriers that would impede the successful implementation of the iREREP; and
- To receive inputs from interested parties, which inputs may be used to support the design of the Request For Proposal requirements.

As of the 20<sup>th</sup> September 2021, RFI documentation will be available on the following websites - [www.irerep.co.za](http://www.irerep.co.za), <https://www.etenders.gov.za> & <https://www.gtac.gov.za>

All RFI related documentation and queries / clarifications must be submitted to both of the following two (2) websites—

- REF@gtac.gov.za and [tenders@irerep.co.za](mailto:tenders@irerep.co.za)

Closing date for the RFI submission: 20 October 2021
