The total revenue for the municipality including capital transfers and subsidies after adjustments amount to **R 568 105 000** for 2024/25, **R 544 366 000** for 2025/26 and **R 546 619 000** for 2026/27.

The revenue from government grants forms a significant percentage of the total operating revenue for the municipality for the entire 2024/25 MTREF. This clearly indicates that our municipality is dependent on government grants which contribute 88% of the total annual revenue, 83% and 82% across 2024/25 MTREF.

Operating Expenditure Framework

As indicated in the original budget, the municipality's expenditure framework for the 2024/25 budget and MTREF is informed by the following:

- The infrastructure projects plan in the IDP to address the backlog and the repairs and maintenance plan;
- Balanced budget constraint (operating expenditure should not exceed operating revenue) unless there are existing uncommitted cash-backed reserves to fund any deficit;
- Funding of the budget over the medium-term as informed by Section 18 and 19 of the MFMA;
- The capital programme is aligned to backlog eradication plan;
- Operational gains/ surpluses will be directed to funding the capital budget.
- Funding was allocated to only projects which have projects implementation plans to guard against under spending.

The following table is a high-level summary of the adjusted operational expenditure budget for 2024/25 and MTREF (classified per main type of operating expenditure):

Narratives on the main ten table of the Adjusted Budget of the Municipality

The municipality experience differences in amounts between the data string and B-schedule during verification by Limpopo Provincial Treasury. The B-schedule pulled different figures which are not aligned to data strings

- Table B6-Financial position- Receivables from non-exchange transactions
- Table B7 Financial position- Payments suppliers and Employees
- Table B8-ResRecon- other current Investment>90 days, unspent conditional transfer, statutory requirements, other working capital requirements and other provisions

The Municipality acknowledge the differences and agree with the finding that the correct amounts are the one on the data strings not on the B-schedule and the system vendor is already engaged to investigate the system error on B-schedule.

2 PART 2 – SUPPORTING DOCUMENTS

2.1 Adjustments to budget assumptions.

2.1.1. Internal factors

- To ensure credibility of the budget and to avoid cash flow problems the total expenditure budget together with the total cash outflow has been adjusted accordingly to be within the municipality's available cash and realistically collectable budgeted revenue. The municipality has achieved a remarkable collection on the following source of income during the current financial year:
- Property rates
- Interest on Bank Account
- Agency fees
- Rentals

2.1.2. General inflation outlook and its impact on the municipal activities

- The following key factors were considered during the preparation of the adjusted budget for the 2024/25 MTREF:
 - National Government macro-economic targets;
 - The general inflationary outlook and the impact on municipality's residents and businesses
 - The impact of municipal cost drivers;
 - The increase in prices for electricity and water; and
 - The decrease in the employee related cost.
- No adjustment has been done to other assumptions as per the original budget.

2.1.3. Interest rates for borrowing and investment of funds.

The MFMA specifies that borrowing can only be utilized to fund capital or refinancing of borrowing in certain conditions. The municipality is not planning to use borrowing to fund its capital projects in the near future as the focus is to stabilize the financial viability of the municipality and borrowing may weaken the municipality's financial position currently.

The following chart is a breakdown of the operational revenue per main category for the 2024/25 financial year as adjusted.

The municipality's Special adjusted budget for 2024/2025 MTREF is funded mainly by the government grants at 88% and the remaining percentage is funded by the own sources of revenue and the VAT Recovery to an amount of **R 132 340 000** backed up by the VAT refunds as at 31st March 2025. The following table summarizes the cash funding of the 2024/25 MTREF adjusted budget:

Tariff setting plays a major role in ensuring desired levels of revenue. Getting tariffs right assists in the compilation of a credible and funded budget. The municipality derives most of its operational revenue from the transfers recognized – operational (government grants), Property rates, capital grants from organs of state and other minor charges (such as licenses and permits etc).

The revenue strategy is a function of key components such as:

- Growth in the municipality and economic development;
- Revenue management and enhancement;
- National Treasury guidelines;
- The Property Rates Policy in terms of the Municipal Property Rates Act, 2004 (Act 6 of 2004) (MPRA), and
- And the ability to extend new services and obtain cost recovery levels.

The above principles guide the annual increase/decrease in the tariffs charged to the consumers and the ratepayers aligned to the economic forecasts.

The approved tariff rates for 2024/25 MTREF for Property rates remain unadjusted and can be shown as follows:

Table 16 Approved tariff reduction over the medium-term

NB: Details of the capital projects and adjustments are in table SB 19 (List of capital programme and projects affected by adjustments)

2.2.3. Cash Flow Management

Cash flow management and forecasting is a critical step in determining if the budget is funded over the medium-term. The table below is consistent with international standards of good financial management practice and also improves understand ability for councilors and management of the municipality. Some specific features include:

- Clear separation of receipts and payments within each cash flow category;
- Clear separation of capital and operating receipts from government, which also enables cash from 'Ratepayers and other' to be provide for as cash inflow based on actual performance. In other words the *actual collection rate* of billed revenue and other own sources of revenue

The above table shows a **R 39.9 million** net decrease in cash held for the 2024/25 financial year and is boosted by the **R 60.5 million** positive opening balance of the municipality's bank account, the municipality's cash flow position improves over the 2024/25 MTREF with a decreasing net increases in the cash flow.

Property Rates

- The municipality has managed to collect **R 21.4 million** from government departments and local businesses by 31st January 2025. The municipality has also considered the customers who pay their accounts on a monthly basis in its calculation for the budgeted cash flow from this source of revenue.

Other Revenue

- Other revenue sources include the rental of facilities, traffic fines, VAT refunds and agency income. The municipality has managed to collect **R 7.3 million** from this sources of cash flow combined by 31st January 2025, 18.6% of the cash collected under the other revenue was from the agency services for licenses and permits, traffic fines, rental , interest on bank account, waste management, Sales of goods and service.
- All other revenue sources are projected to be collected at 100% as per the adjustments budget.

Government Grants & Transfers Cash Flow Assumptions

- All government grants are projected to be received at 100% and all conditional grants are projected to be spent at 100% by end of the financial year.

Interest on investments Cash Flow Assumptions

- The municipality is expecting to receive 100% of the annual adjusted budget on revenue from interests on positive bank balances.

2.2.4. Cash Backed Reserves/Accumulated Surplus Reconciliation.

This following table highlights the requirements of the MFMA Circular 42 which deals with the funding of a municipal budget in accordance with sections 18 and 19 of the MFMA. The table seeks to answer three key questions regarding the use and availability of cash:

- What are the predicted cash and investments that are available at the end of the budget year?
- How are those funds used?
- What is the net funds available or funding shortfall?

A surplus would indicate the cash-backed accumulated surplus that was/is available. A shortfall (applications > cash and investments) is indicative of non-compliance with section 18 of the MFMA requirement that the municipality's budget must be 'funded'. Non-compliance with section 18 is assumed because a shortfall would indirectly indicate that the annual budget is not appropriately funded (budgeted spending is greater than funds available or to be collected). It is also important to analyse trends to understand the consequences, e.g. the budget year might indicate a small

surplus situation, which in itself is an appropriate outcome, but if in prior years there were much larger surpluses then this negative trend may be a concern that requires closer examination

LIM473 Makhuduthamaga - Table B8 Cash backed reserves/accumulated surplus reconciliation -

The municipality is planning to spend on all the conditional grants received during the 2024/25 financial year, therefore the balances on unspent conditional grants are zero throughout the MTREF.

The municipality's third party payments such as SARS under the statutory requirements are accounted for under the employee related costs on B7 as part of the payments to suppliers and employees over the 2024/25 MTREF. The VAT portion is also accounted for as part of the payments to suppliers and also under the capital assets payments on the B7.

The main purpose of the other working capital is to ensure that sufficient funds are available to meet obligations as they fall due. A key challenge is often the mismatch between the timing of receipts of funds from debtors and payments due to employees and creditors.

High levels of debtor non-payment and receipt delays will have a greater requirement for working capital. Any underperformance in relation to collections could place upward pressure on the ability of the municipality to meet its creditor obligations.

It can be concluded that the municipality has a surplus against the cash backed and accumulated surpluses reconciliation.

Funding compliance measurement

National Treasury requires that the municipality assess its financial sustainability against fourteen different measures that look at various aspects of the financial health of the municipality. These measures are contained in the following table. All the information comes directly from the adjusted budget statement of financial performance, financial position and cash flows. The funding compliance measurement table essentially measures the degree to which the proposed budget complies with the funding requirements of the MFMA.
