

Lephalale Municipality Top Performer in Limpopo Province: Drinking Water Quality and Water Systems Management.

The Department of water Affairs has given Lephalale Municipality's tap water the thumbs up. The three institutions striving for best water quality for our consumers (Lephalale Municipality; Exxaro and Eskom) received a prestigious trophy for being the top performer in Limpopo Province with the Municipal Blue Drop Score of 92.84 %

Onverwacht and Lephalale Town residents can be assured that they are drinking the best water in the country directly from their own tap. This is confirmed by the Municipal and Zeeland Water Treatment Works system score of 95.02 % as achieved in this year (2012)'s Blue Drop report and Blue Drop status awarded as a result. Although Municipal and Matimba Treatment Works system did not receive Blue Drop status, Marapong residents are also assured that our drinking water quality is of best quality with a Blue Drop score of 88.34 %.

The Blue Drop Certification status is awarded to South African Municipalities that have the best water quality. The certification goes beyond just the quality of drinking water; it includes aspects such as risk management, operations and asset management of water services.

Blue Drop is an incentive-based regulatory initiative that requires water services institutions to provide information in line with the legislative requirements of section 62 of the Water Services Act.

Consumers are therefore also encouraged to browse the status of their drinking water quality @ www.dwa.gov.za/mywater.

For enquiries and clarities, feel free to contact Mr. Lekwalo Marakalala (MWISA) our Engineering Technician: Water Services at 014 762 1467 or 083 520 8388.
